The percentage and graphical methods were used in this study to present the results of the study.

Key word – facilities of wrestling game.

INTRODUCTION

Sports infrastructure plays a crucial role in achieving excellence in the global arena of sports. It not only helps in producing sportspersons of international repute, but also encourages the youth population of a country to participate in sporting activities to create a culture of sports. In India, the standard of sports infrastructure is not at a satisfactory level for a number of reasons. The lack of infrastructural facilities is one of the major impediments in the process of development of sports in India. The objective of this article is to analyze the present state of sports infrastructure of the country and propose a possible road map for its development. In recent years, a phenomenal growth has been observed in Indian sports with the staging of mega-events such as the Commonwealth Games 2010, Hockey World Cup and Cricket World Cup, and the winning of medals in the international competitions.

India won a total of six medals in the 2012 London Olympics, including two silver and four bronze. The success of Sushil Kumar, Abhinav Bindra, Mary Kom, Saina Nehwal and Sania Mirza has already established the

country on the global sports map. The continued success of Jeev Milkha Singh, Arjun Atwal and Jyoti Randhawa has created a prominent position for India in the discipline of golf. In cricket, India has already emerged as a superpower due to its excellence in sporting and commercial performance. A number of schemes have been introduced to promote sports at the grass-root level. PYKKA is one of them. Despite all these successes, it is pertinent to mention that the sports infrastructure in India is still not at the desired level, and this creates an obstacle in developing sports in the country.

In the next section of this article, a critical evaluation will be made of the initiatives adopted to build and sustain sports infrastructure in India. 1982 was a significant year in the history of sports in India when the country organized the Asian Games for the second time. Prior to that, hardly any emphasis was given to sports in the public policy arena.

METHOD

The major objectives of the study –

- To measure the available wrestling facilities for the players of the colleges or students those who interested in the wrestling.
- To compare the sports facilities of wrestling among the government and private colleges of the Hyderabad Karnataka region.

The hypothesis of the study –

- There is not significantly difference in the facilities related to the wrestling game in the degree colleges

Sample of the study-

The twenty four government and thirty two private colleges of the Hyderabad Karnataka region those colleges were represented inter university wrestling competitions.

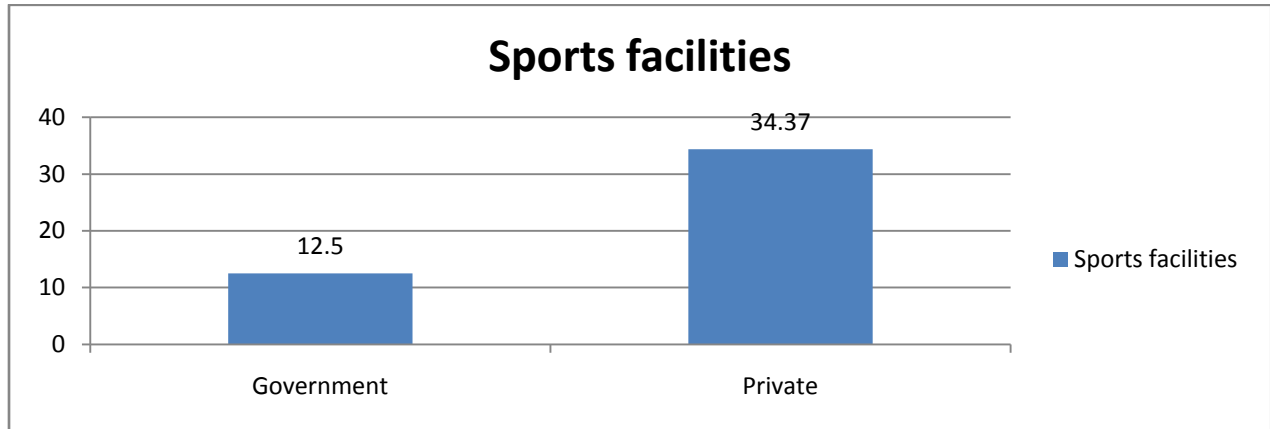

Research Tool

The self structured questionnaire of sports facilities of wrestling games in the government and private colleges of Hyderabad Karnataka regions.

The percentage and graphical methods were used in this study to present the results of the study.

Table No. 1 Showing the Sports Facilities of Wrestling in the colleges

Sample	Colleges	MAT		Equipments/Materials	
		Yes	No	Provided	Not Provided
Government	24	3 12.5%	21 87.5%	3 12.5%	21 87.5%
Private	32	11 34.37%	21 65.63%	11 34.37%	21 65.63%

The result of the study showing that the private colleges are provided more facilities of wrestling game and the government colleges of the Hyderabad Karnataka region. The government colleges are not ready to promote the wrestling game due to insufficient sports facilities of the game.

FINDINGS

The private colleges are provided higher sports facilities related to the wrestling in the college arena. The government colleges are not provided sufficient facilities related to the wrestling in the colleges arena.

The both private and government colleges of Hyderabad Karnataka region are not provided sufficient facilities to the students of the region.
