

A SURVEY ON SPORTS FACILITIES AND SPORTS PARTICIPATION IN THE GOVERNMENT AND PRIVATE DEGREE COLLEGES OF HYDERABAD KARNATAKA REGION

KARABASAPPA PARAMESHWAR

ABSTRACT

The sports facilities having the vary importance matter for the development of the sports performance in the degree colleges, without the sports facilities we cannot imagine the sports development in the colleges of Hyderabad Karnataka region. The present study based on the survey method to analysis the sports facilities and sports performance in the government and private colleges of Hyderabad Karnataka region. The main objectives of the study to know the sports facilities in the government and private degree colleges and also compare the sports facilities of athletic events in the government and private colleges. To know the influence of sports facilities on the sports participation and performance. The hypothesis stated that there would be difference in sports facilities of athletic events among government and private colleges of Hyderabad Karnataka region. There would be influence of sports facilities on the sports participation and performance of the players belonging to the colleges. The sample of the study – 24 government and 32 private colleges those who have actively participated at inter university level sports competitions. The percentage method used in the study to analysis the status of sports facilities in the colleges and also the sports performance at inter university athletic competitions.

Key words – Sports facilities, colleges.

INTRODUCTION

Development of Sports in India

During the primitive days people used to indulge in sports for the sake of entertainment. Recreation was the main aim of sports. Greeks were considered to be first who brought physical education in sports to glorious heights by making the games an integral part of the national policy and education. Slowly the concept of the sports change from recreation to competition. Today we see the flood of competitions at international level, such

as Olympic Games, Asian games, common wealth games, SAIF Games, Afro Asian Games etc. Today sports is considered integral to all-round development of one's personality. Making an international mark in the field of sports also has a great bearing on national morale and prestige. In order to meet the increasing demands of the changing times, at national as well as international level, the government has taken upon itself to implement programmes to promote excellence in sports.

Abas (1982) conducted study on the facilities and equipment of sports in engineering colleges in West Bengal and found that the student teacher ratio was satisfactory and only one college provided special coaches different games and sports. Only three engineering colleges out of five had sufficient playground facilities. Sufficient equipment and playgrounds were not found in all the selected engineering colleges as per their student's strength.

METHOD

Significance of the study

This study will be evaluated the sports facilities provided to the college students who have been representing and participating in inter university level Athletic competitions. (2012-17) This study also highlighting the lacunas in the sports facilities in the colleges both government and private.

Objectives of the study
